Siemens low voltage switchgear is designed, tested, and constructed to provide superior power distribution, power monitoring, and control. Utilized in a range of applications like industrial, institutional, critical power, and commercial, the switchgear solution is created for your world-class operations.

The Siemens range of gas-insulated switchgear (GIS), for rated voltages from 72.5 kV up to 550 kV, is an extremely successful product concept. Since its introduction back in 1968, Siemens has installed switch fields in all climatic zones of the earth, recording over 420,000 years of operation since.

For the distribution of electrical energy, Siemens offers various gas-insulated switchgear types, which can be used in transformer and distribution systems of power supply companies, but also in industrial medium-voltage systems, e.g. mining industry, steel works or paper industry. Siemens gas-insulated switchgear is also the first choice for special applications such as wind parks, offshore ...

Siemens' scope of supply comprises much more than the high-voltage equipment that is required for the operation of a substation. It includes high- and medium-voltage switchgear, transformers, and equipment as well as all ancillary systems for control, protection, communication, and condition monitoring.

In its place, Siemens will build two gas-insulated switchgear (GIS) with 14 and 12 panels during the first expansion stage and 18 and 15 panels, respectively, in the final stage in Karlsruhe. They will more adequately meet the space requirements and simultaneously increase the transmission capacity. The GIS systems are designed specifically to meet the customer's special availability and ...

Siemens DC GIS reduce space requirements for the switchyard of transition stations to a minimum: The modular, encapsulated, and compact Siemens DC GIS for rated voltages of up to ±550 kV require remarkably less space than technically equivalent air-insulated switchgear – this way bringing down land costs and reducing the visual impact of the switchyard.
